**To:** Attorneys & Paralegals

**From:** David Yen

**Subject:** Eligibility Chart

**Date:** February 13, 2007

The following chart sets forth income guidelines for various programs which are based on the federal poverty guidelines, as revised by HHS on January 17, 2007. Please note, not all programs are automatically updated, so in some cases the increases are not effective until updated manual releases are issued or other formal action is taken (e.g., LAFMC guidelines do not increase until Board action is taken, and the food stamp guidelines will not change until later in the year). All guidelines are per month unless otherwise noted. If there are errors, or other programs whose guidelines you think should be included in this chart, please let me know.
